

ABSTRACT

The new pharmaceutical compositions contain, apart from one or more active ingredient(s),

5

- between 0.01 and 60% w/w of the compounds of formula I

10

with n and m > 18 and < 46 and with molecular weights between ~600 and ~8000

15

for the enhancement of absorption of the active ingredient(s).

Moreover, such compositions may contain also between 0.01 and 20% w/w of Phosphatidylcholine.
